

## **Taylor Knott graduates cum laude: Bachelor of Technology in Agricultural Management**

**Taylor Knott, pictured with his proud family at his graduation in April 2015**

Taylor was diagnosed as profoundly deaf as a baby and started parent guidance at eleven months old, with Michele Nel at the Theodore Blumberg Clinic which was later to become the Carel du Toit Centre.

Initially fitted with hearing aids, it was decided to give Taylor a cochlear implant at the age of three years to give him better access to sound. Taylor attended the Carel du Toit Centre until the age of five years and completed his education in a mainstream school ... Merrifield.

Taylor will be travelling to Switzerland for a month and then on a Contiki Tour around Europe finishing with a month in Ireland.
