Boland School for Autism is a young school that was started by parents and professionals in 2009 to meet the dire lack of facilities for children on the autism spectrum. Self funded, Boland School for Autism has grown to 19 children; each child requiring a specialized teaching program (Individualized Educational and Development Programme) to ensure they may grow to their full potential. In addition to our teaching staff we employ various specialists to assist our children in meeting the challenges of autism (communication, behaviour, social and sensory), including speech therapy, occupational therapy, educational psychologist, bio-kineticist, play therapists, etc – a long list of professionals!

Funds generated on our golf day will help ensure we continue to offer the facilities our children need on a daily basis as well as meeting our long term goal of owning our own facility with full time specialists and accommodation for children who would otherwise not have access to the special services autistics need to grow and develop.

Our golf day promises to be a fun filled event with refreshment on the course, various competition and fun events which will be followed by dinner and prize giving.
