## Natasha Odendaal

How is an idea generated? How often do you get an idea downloaded into your spirit and you just know you have to abide? Holy spirit did just that. In 2017 Impactify was conceived in my heart and I knew I had to pursue it.

With a background in Psychology and Sociology, entrepreneur and business owner, loving mother of two boys and devoted wife I am passionate about my family and my work. "I have a true passion to see a new generation of impacted people. Leaving a legacy."

The idea was refined and perfected into what you will experience hopefully very soon.

Next level Wellness programs developed for corporate companies, to equip employees in their day to day, as well as in their personal lives. Giving them practical tools and guidance into wholeness.

Impactify seeks to positively impact all employees to have a positive ripple effect/ impact on all areas of their lives.

The vision of Impactify is to see employees happy in their work-life thus improving productivity and work/life balance.

I am excited about the Impact we could make together.
