

Cannabis Curves (Hormonal Programme)

Detox Capsules (10)	10-day supply	Take 1 in the morning after breakfast or 1 in the evening after dinner Recommended for 10 days on, 5 days off
½ ml CBD Plus Caps (30)	1 month supply	Take 1 AFTER dinner (no hot drinks for 30 mins)
Moringa (60)	1 month supply	Take 1 capsule twice a day, morning and evening
Hormone Balancing Tea – Powder 250ml	-	1 Heaped tablespoon of Tea, steeped in hot water (not) boiling), infuse for 5 minutes, remove herbs, and sip slowly. Hormone Tea can be drunk up to four times a day. Most experience better results after taking it regularly for a month. If it gives the patient the desired result, they should continue taking it between 1 – 4 times a day, depending on the severity of their hormone fluctuations.

The rules are as follow:

- **DRINK** lots of water. Try for at least 30ml / kg. Water, tea, etc. keeps you hydrated and helps with all body functions [including burning off some calories].
- **SPEED.** Just like a car accident, SPEED kills. You didn't pick up the weight overnight, so don't think that it is healthy to lose tons of weight in a short period of time.
- **DIET. DO NOT** Diet. Make smarter choices. Cut unhealthy food or habits. THUS try for a better lifestyle NOT a quick yo-yo diet but something you can keep up and live with.
- **STRESS LESS.** People with high stress levels [cortisol is a stress hormone] tend to struggle with weight and some with emotional eating to boot.
- **SLEEP.** Good, restful sleep promotes healthy, easy weight loss. Quality sleep is important for the body to re-boot and maintain a healthy metabolism.
- **MOVE.** Being active does NOT mean you have to spend hours in a gym or run like a warrior. Walk the dog. Go for a brisk walk just around the block. Take the stairs. Park your car two rows further from the shop.
