What is National braai day?

Heritage Day is an annual public holiday held on 24 September to celebrate the diverse cultures and traditions that make up South Africa.

What happened on 24 September Heritage Day?

Heritage Day on 24 September recognises and celebrates the cultural wealth of our nation. South Africans celebrate the day by remembering the cultural heritage of the many cultures that make up the population of South Africa. Various events are staged throughout the country to commemorate this day. that you all are going to braai on the 24th.

Hi Almal

Hoop julle het sommer 'n baie lekker Augustus gehad en dat julle, julle Mamma's bederf het op Vrouedag want sonder hulle is ons verlore weet ek sou wees sonder my Ma. Top Vibe het beslis die Mamma's en Ouma's bederf met 'n awesome Vrouedag Funksie waar my Ma en Tannie Charmaine betrokke was en van wat ek gesien het op foto's en gehoor het by my familie was dit groot sukses. Well done Mamma en Tannie Charmaine.

Maats, daar kom 'n paar interessante uitgawes vanaf Oktober tot Desember van my kant af ek gaan heelwat interessante goeies met julle deel en hoop julle gaan dit net so geniet soos wat ek gaan om dit vir julle te vertel.

Vir eers konsentreer ek op my skoolwerk ons is tans besig met Asseseering en Take vir Kwartaal 3 en tussen in swem ek omtrent elke 2de naweek Gala so dit is bedrywig en besig maar tog lekker. Ek tel al die dae af wanneer my 2de groot deel van my lewe begin en dit is Hoerskool.

Kyk mooi na julle self pas mekaar op en waardeer mekaar, en onthou: Jy is alles in staat deur hom wat jou krag gee - As jy ooit twyfel kyk net na BO!

Tot volgende keer

Dyne

Model Eksamen 2022

Meagan Rielander vir iemand wat 8 maande laas model gedoen het... WOW WOW WOW Jy het weer eens bewys dat DIE jou passie is 🏆

♥ Deon Walter Krausr Mariëtte Krause ~ julle is ongelooflike mense. Ons is so blessed om deel te wees van S A All Star Model Academy - East Rand. Julle harte vir ELKE model is ongelooflik ♥ ☆ Dankie!

Deon vir al jou liefde, ek kan sien hoe kalm Meagan is, en dit maak my hart bly. Renesca Ferreirinho - no words, you know what a GEM you are 💎♥ Dankie pappa Clinton Rielander en MichaylaKie wat die heeldag gesit en wag het vir Meagies

♥♥ PS : Ek dink ons het vergeet hoe moeg model maak, elke Rielander in die huis gesin is nou al in die bed 🤔

Liefde tot volgende keer

Meagan

Fun facts about space

Did you know?

Fun Facts and Information About Space for Children:

The Largest Asteroid Is About 965 Km Wide. ...

There Are Tire Tracks on the Moon. ...

The Sun's Surface Area Is 11,990 Times the Earth's Size. ...

A Dog Has Gone to Space. ...

This Is Why the Moon Glows and Follows Us. ...

Black Holes Cause Spaghettification. ...

Rotation Causes Day and Night

20 UNUSUAL SPACE FACTS

There's a lot of crazy facts about outer space

The universe is a bizarre place. It's packed full of mysterious alien planets, stars that dwarf the Sun, black holes of unfathomable power, and many other cosmic curiosities that seem to defy logic. Below, we highlight a small sampling of the countless unusual space facts about our own planet and the vast universe beyond.

It would take nine years to walk to the moon.

Mars is called the Red Planet because of its red coloring, which comes from the large amount of iron oxide – known on Earth as rust – on the planet's surface.

Mercury's temperature varies from -280° F on its night side to 800° F during the day.

If you can spot the Andromeda Galaxy with your naked eyes, you can see something 14.7 billion billion miles away.

The Sun is 400 times larger than the Moon, but also 400 times as far away, making both objects appear to be the same size in our sky

Jupiter is the largest planet. It could contain the other seven planets in just 70 percent of its volume.

Stars don't twinkle until their light passes through Earth's atmosphere.

If Earth were the size of a tennis ball, the Sun would be a sphere 24 feet across, approximately 0.5 mile away.

Of the 9,113 official features on the Moon, a mere 421 (4.6%) are not craters.

Driving a car to the nearest star at 70 mph would take more than 356 billion years.

Neptune's moon Triton is the coldest known object in the solar system with an average surface temperature of -391° F.

When the Moon is half-full (First and Last Quarter phases), it's only 10% as bright as the Full Moon.

Scientists estimate that the earliest stars formed some 200 million years after the Big Bang.

Jupiter's Great Red Spot, which rotates once approximately every six days, is an anti-cyclonic storm 22° south of the planet's equator.

If you drilled a tunnel through Earth and jumped in, you would reach the other side in 42 minutes and 12 seconds, and your top speed would be 17,670 mph.

To escape Earth's gravity, a spacecraft must travel more than 25,008 mph, or near Mach 33.

It takes 1 billion seconds for the light from a star 31.7 light-years away to reach Earth.

The International Space Station completes an orbit of Earth in about 90 minutes.

Venus' clouds trap a lot of the Sun's heat, making its temperature the hottest in the solar system: 863° F.

If the Milky Way were the size of a single tennis ball, the Andromeda Galaxy (M31) would lie 5.6 feet away.

Chef Tommy

MAKLIKE PLAATKOEKES

- 1 eier
- 1 eetlepel suiker
- 1 koppie melk
- 1 koppie koekmeel
- 1 teelepel bakpoeier
- knippie sout

Klits die melk, suiker en eier saam.

Voeg die meel, sout en bakpoeier by.

Drup 'n bietjie olie in 'n pan en smeer die oppervlakte daarmee.

Sit plaat op medium hitte.

Skep lepelsvol entjies uitmekaar in die pan.

Wanneer dit begin borrel, draai om vir paar sekondes en tot gaar.

Kom bak en brou saam met my!

Saving Fun!

Rabbit Facts

Rabbit facts

A baby rabbit is called a kit, a female is called a doe and a male is called a buck.

Rabbits are very social creatures that live in groups. ...

A rabbit's teeth never stop growing! ...

Rabbits perform an athletic leap, known as a 'binky', when they're happy — performing twists and kicks in mid air!

What are 3 interesting facts about rabbits?

Image result for fun facts for kids about rabbits

Facts about rabbits

A single bunny is a lonely bunny. ...

They can live for up to 12 years. ...

They're masters of hearing. ...

Their eyesight isn't bad either. ...

They're closer to wild rabbits than you might think. ...

Rabbits communicate using a secret code. ...

Baby rabbits are called 'kittens' ...

Rabbits and guinea pigs don't make good pals

What are some good facts about rabbits? Fun Facts About Rabbits To express happiness, bunnies will sometimes jump around and flick their heads and feet. ...

Like deer, a female rabbit is called a "doe" and a male rabbit is called a "buck."

A bunny's big ears aren't just for listening! ...AND those amazing ears can also be rotated almost a full circle to 270 degrees.

What do rabbits eat kids facts?

Rabbits love to eat and they will eat things like grass, vegetables, wild strawberries and even flowers during the summertime. In winter they will even eat the bark from trees. They love to eat around dusk.

What do rabbits live for kids?

Habitat and Diet Rabbits like to live in groups, and they can be found in grasslands, forests, meadows, and even deserts! Some rabbits like to create burrows, or dig holes and tunnels in the ground. This is where they often give birth to their young. Males are called bucks, and females are referred to as does

What kills rabbits fast? Rabbits are eaten by wolves, coyotes, and stoats. Wolves, coyotes, birds, stoats, dogs, and ferrets are some of the animals that eat rabbits. Most rabbits are quick on their feet, and may sometimes outrun a predator

What is a rabbits favorite color?

Image result

Offering red carpets, cushions, or blankets to your rabbit allows them to seek out this vibrational energy whenever they need it. In my work with rabbits and other animals, it's very evident that they love to lie on the red when they lack regular contact with the outdoors. In contrast to red, blue is cooling.

Are rabbits blind?

Rabbits have almost 360-degree vision with the exception of two blind spots: one directly in front of their head and another immediately behind their head. They can still be startled by sudden, unexpected movement, so always approach your rabbit in a way that allows them to spot you as early as possible.

Do rabbits blink?

Rabbits only blink ten or twelve times an hour. You may never see it because rabbits have a nictating membrane, or third eyelid, in front of the cornea. This transparent eyelid keeps a rabbit's eyes moist, negating the need to blink. If your rabbit is blinking a lot, her eye is likely irritated.

Fun Rabbit Facts

Verken voëls Deel 2

WAT IS 'N Voël?

Voëls is warmbloedig vertebrate (dit beteken hulle het ruggrate) en is die enigste diere met vere.

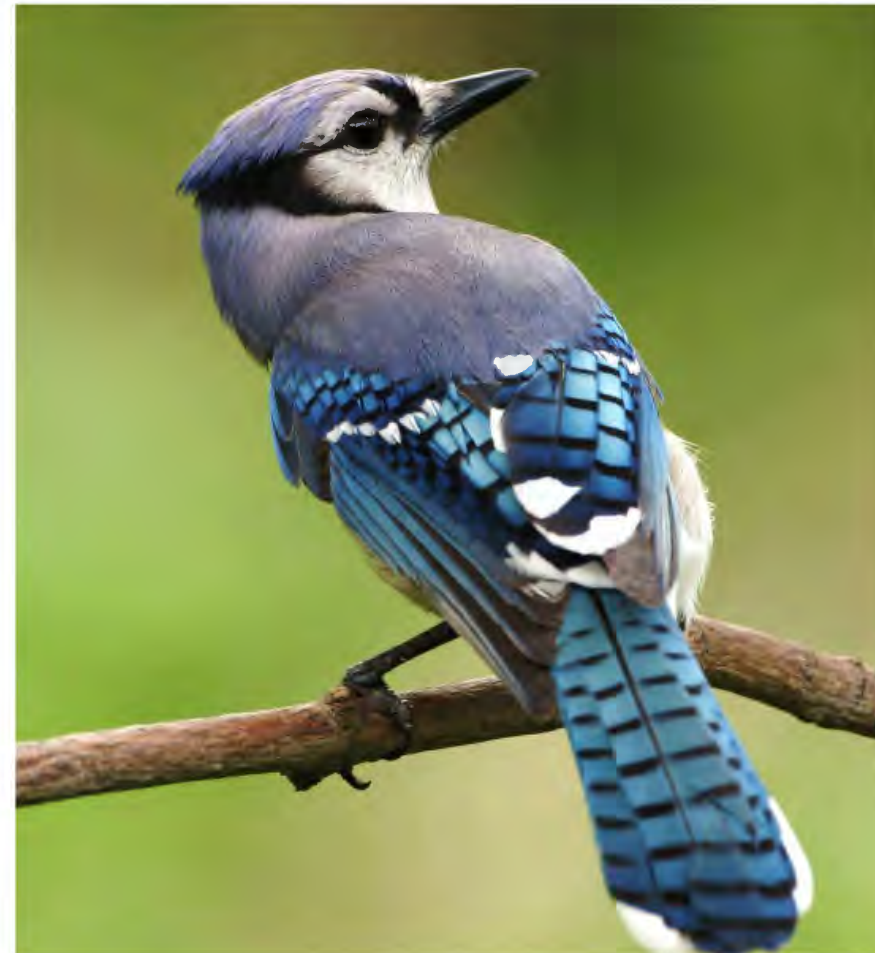

Al het alle voëls vlerke, kan nie almal van hulle vlieg nie, Behalwe hulle vere, word voëls gekenmerk deur hulle tandlose snawels, hulle lê eiers met harde doppe, het 'n hart met vier kamers en 'n sterk, maar ligte geraamte.

OM TE Vlieg OF NIE....

Vir voëls om te kan vlieg, moet hulle bene lig en hol wees, hulle moet nie te groot groei nie en hulle moet 'n kielbeen het waarvan hul vliegspiere heg.

Voëls wat nie kan vlieg nie het swaarder liggame ontwikkel, hul bene is digter en het kleiner of geen vlerke nie.

Hul bene is soos gewoonlik langer as voëls wat kan vlieg.

HULLE BLYPLEK:

Voëls gebruik hulle sterk snawels om vesels soos stokkies, mos, gras en modder te manipuleer en te weef in 'n nes. Sommige gebruik hulle speksel as "nesgom" of maak staat op om dit ekstra sterk te maak.

Daar is verskeie neste soos bekerneste (dit lyk soos 'n beker) En aanklewende neste (hulle gebruik modder en speksel en bou dit in bome en teen geboue)

Sommige voëls, soos uile bou nie hulle eie neste nie, maar "huur" een. Hulle gaan bly in neste wat ander voëls verlaat het of hulle bly in gate in bome.

Voëls gebruik neste om hul eiers in te lê, uit te broei, kleintjies groot te maak en te beskerm teen roofdiere en die weer.

MIGRASIE:

Voëls beweeg van plekke waar hulpbronne minder word plekke met baie hulpbronne. Die twee goed waarna hulle die meeste soek, is kos en 'n plek om hulle nes te bou.

Voëls wat trek word trekvoëls genoem (soos swane en swaeltjies) genoem en voëls wat op een plek bly, standvoëls (soos die groenbossanger)

In die somer kom omtrent 120 spesies na Suid-Afrika uit byvoorbeeld die Midde- Ooste en Madagaskar. Ander voëls (soos flaminke) trek in Afrika op of selfs net binne landsgrense (soos die janfrederik) rond.

ALLES OOR SLANGE DEEL 2

Daar is duisend slangspesies op aarde en hulle is interessant van die punte van hul tong tot hul sterte. Lees en lees saam

Volg in die volgende uitgawe

HOE SLANGE JAG

Slange het gevurte tonge wat hulle rondklap om hulle omgewing te ruik. So weet hulle of gevaar of kos naby is.

Die kleingatjies by hulle oë tel hitte op wat deur warmbloedige prooi afgegee word en hulle bene in hul onderste kaak tel vibrasie op van diere wat skarrel.

Hulle kan 'n prooi vreet wat tot drie keer groter as die breedte van hul kop is, want hulle onderste kaak haak uit. Die prooi word in plek gehou

HET JY GEWEET?

Slange is reptiele en daarom is hulle kouebloedig. Hulle moet dus hul liggaamstemperatuur van buite af beheer soos om in die son te lê

Amper alle slange is bedek met skubbe. Die skubbe behou vog en verminder wrywing wanneer hulle beweeg.

Daar is slange wat meestal nie skubbe het nie, maar selfs hulle het skubbe op hul mae.

Een keer per maand vervel slange om plek te maak vir hul groei en om ontslae te raak van parasiete.

Hulle vryf hulself teen iets soos 'n boom en seil dan kop soos eerste uit die vel. Dit veroorsaak dat die vel met die binneste deel buite lê. Die meeste slang lê eiers, maar sommige spesies soos seeslange gee geboorte aan lewendige kleintjies.

Voorblad Model - Eagan Engelbrecht (4)

Eagan Engelbrecht van Ermelo, is maar net 'n 4 jarige mannetjie. Hy palm die titels een na die inder in hier is maar net 'n paar fotos van die mannetjie.

Sy ouers is so bitter trots op hom. Daar wag nog groot dinge op hom hy het klaar almal se harte verover.

Sy titels is soos volg:

Mr Mini Suid Afrika 2022

Little Mister Universe 2022

Photo Model Wold 2022.

Top Vibe Kids Magazine het 'n voorblad gesoek en klein Eagan het mens se oog dadelik gevang.

Daar was so baie inskrywings ons staan ons voorblad van die Oktober uitgawe ook af aan een van ons inskrywings.

Baie dankie vir al die inskrywings wat ons ontvang het. Weet net elkeen van julle is 'n wenner.

Baie geluk Eagan jy is 'n pragtige voorbeeld. Ons hou vir jou dop.
